

Fundamentos da Web

Julia Peres Cardoso – RA 10771419

Site - <https://www.w3.org/>

The screenshot shows the W3C Validator's Checker Input interface. The URL <https://www.w3.org/> is entered, and the 'Check' button is clicked. Below the input area, a message says 'Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.' A 'Message Filtering' button is present. The main area displays four numbered warnings:

1. **Warning** | The `list` role is unnecessary for element `ul`.
From line 94, column 17; to line 94, column 51
`<ul class="clean-list" role="list">`
2. **Warning** | The `img` role is unnecessary for element `img`.
From line 105, column 17; to line 105, column 102
``
3. **Warning** | The `list` role is unnecessary for element `ul`.
From line 486, column 17; to line 486, column 51
`<ul class="clean-list" role="list">`
4. **Warning** | The `list` role is unnecessary for element `ul`.
From line 496, column 13; to line 496, column 47
`<ul class="clean-list" role="list">`

Site - <https://www.einstein.br/n/>

The screenshot shows the Nu Html Checker interface. The URL <https://www.einstein.br/n/> is entered, and the 'Check' button is clicked. A blue header bar reads 'Nu Html Checker'. Below it, a message says 'This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change'. Underneath, it says 'Showing results for <https://www.einstein.br/n/> (checked with vnu 26.2.5)'. The Checker Input section is identical to the W3C Validator one. At the bottom, a green bar states 'Document checking completed. No errors or warnings to show.' Below this, smaller text notes the parser used (HTML parser, UTF-8 encoding), the execution time (163 milliseconds), and links to 'About this checker' and 'Report an issue'.

A Atuação Brasileira na Padronização da Web Mundial

A presença do Brasil no W3C é coordenada pelo Ceweb.br (NIC.br/CGI.br), sendo o primeiro escritório da organização na América do Sul. O país exerce um papel estratégico na construção da web global, destacando-se na liderança de projetos de acessibilidade digital (tradução e adaptação das normas WCAG) e na criação de padrões para Dados Abertos governamentais. Por meio de grupos de trabalho e fóruns públicos, especialistas e desenvolvedores brasileiros garantem que as tecnologias da rede mundial respeitem as leis e a diversidade do nosso país, assegurando uma internet democrática e tecnicamente padronizada.
